

FeboLube Universal

Idle Unit Roller Lubricant

Uses

FeboLube Universal is used to protect rollers in idle units. To be used on dry running rollers when not printing in all printing units. Can be used with conventional, hybrid, or UV printing.

Characteristics

- Prevents dry running of inking rollers
- Prevents damage caused by overheating
- Prevents damage caused by abrasion
- Increases roller life
- Compatible with EPDM (UV), NBR (conventional), and Chameleon (mixed mode) rubber compounds
- Will not mist
- Does not require replenishment

Application

Apply a thin film of FeboLube Universal to idle rollers with an ink knife. Use enough to mimic a normal ink film thickness. After use on EPDM rubber remove with an approved Böttcher roller wash such as Böttcherin Offset UV, Böttcherin UV-60 S, or Böttcherin UV-Lite. When used on conventional rollers, any Böttcher conventional roller wash may also be used.
