

Böttcher Aqua Ease

Water Additive For Automatic Blanket & Roller Wash Systems

Uses

Böttcher Aqua Ease is a multi-functional product that can be simply added to the water tanks in automatic wash systems. Aqua Ease speeds the final cleaning in the wash system and reduces surface tension resulting in a more even spread on the blanket and roller. Aqua Ease helps keep wash-up trays, return pipes, and wash nozzles clean. Will also prevent calcium residue in the water basin. Aqua Ease removes the remaining ink and solvent residue from rollers at the end of wash-up cycles and improves the cleaning performance on cloth type blanket wash systems. The end result is a dry, clean surface on the blankets and rollers.

Application

Add Aqua Ease to the water tanks in the automatic blanket and roller washing systems in sheetfed presses at a dilution rate of 5% or 6.5 oz. per gallon.

Packaging

1 Qt / 806910 • 5 Gal / 806911 • 55 Gal / 806912

Characteristics

- Speeds final cleaning
- Reduces surface tension
- Keeps wash-up trays, return pipes, and wash nozzles clean
- Prevents calcium residue in the water basin
- Removes ink and solvent residue at the end of wash-up cycles
- Improves the cleaning performance on cloth type blanket wash systems
- May not be used with filtration systems
