

Böttcher APA

Anti-Piling Agent

Uses

New generation anti-piling agent. Does not contain ether or alcohol. Dramatically reduces the build-up of paper lint on blankets and minimizes hickeys and paper lint on print media.

Application

Directions For Use: Add at a rate of 1 oz. per gallon to existing fountain solution. Adjust as needed for papers or inks that produce high levels of picking and build-up on the blankets. This additive will have minimal effect on the fountain solution conductivity readings. If you desire, a baseline conductivity of 1 oz. per gallon can be subtracted from the total readings.

Characteristics

- Contains no ether or alcohol
- Reduces the paper lint build-up
- Minimizes hickeys

Technical Specifications

- VOC 2.28 lb/gal
- HMIS 1 - 0 - 0 - B

Packaging

- 1 quart (6 per case)
- 1 gallon (4 per case)
- 5 gallons
